

THEY STARTED IT

Science
and Us

Choose the correct options from the box.

1. I am the founder and CEO of Zomato, the food delivery app.
2. I am responsible for the first successful communication, in 1990, between a client and a server via the internet—the World Wide Web (WWW).
3. I founded Amazon in 1994 as an online bookstore. Today, it is a multinational technology company.
4. I was a mathematician and an astronomer. I suggested that the earth is a sphere, spinning on its own axis. India's first artificial satellite is named after me.
5. I founded Sulabh International Social Service Organisation in 1970. The Sulabh International Museum of Toilets explores the history and evolution of toilets and sanitation systems.
6. I built the first mobile cell phone. I am from the United States of America.
7. I am the co-founder and CEO of Ola consumer, formerly Ola Cabs.
8. I was a French inventor. I developed the reading system for people with visual disabilities. Raised dots on paper help these people to read by touch. My system has been named after me.
9. My company created 'Windows', a popular computer operating system which is used around the world.
10. I was a mathematician who lived in ancient India. I was the first to treat 'zero' as a number.
