

FACTS OF LIFE

Tick 'True' or 'False'.

1. Octopuses have five hearts.
2. Cheetas can run twice as fast as humans
3. Mosquitoes do not have teeth.
4. Babies and people who are sick may drink cow's milk because it is easier to digest than goat's milk.
5. Camels sway from side to side when they walk because they lift both their legs on one side, at the same time.
6. If you start to lose your balance, you use your arms to regain your balance. Monkeys, in the same situation, use their tails.
7. Sensing the fear of being attacked, a pangolin rolls itself up completely into a protective ball.
8. Birds of prey have powerful, hooked beaks.
9. While hunting, dolphins produce bubbles to herd their prey to the surface.
10. Bears are non-vegetarians.

Find Out

... the names of three:

- a. birds of prey
- b. birds that cannot fly
- c. birds that can swim and fly

Did You Know?

- ➡ The kiwi is the only bird with nostrils at the end of its beak. Unlike most other birds, it hunts by smell.
- ➡ Tiny drops of a pinkish liquid ooze from the skin of a hippopotamus. This oil prevents its skin from drying, and also protects it from sunburn.
