Answer the following questions.

1. How were goods for trade transported in ancient times?

Ans The earliest human beings did not have vehicles to carry large and heavy things—they dragged them from place to place. Later, no wheeled vehicles like carts were invented that could transport goods from goods from place to place. The muscle power of bullocks or horses was used to move vehicles.

2. What power was used by early ships and how was this different from the powers used in the ships of 19th century?

Ans Early boats used the muscle power of rowers, while sail boats used wind power. New steam ships used this power in engines fitted in their ships.

3. How has travel between India and Britain changed in the type of mode of transport and the time the

journey takes? Explain in two or three sentences.

Ans Earlier, travel between India and Britain used to take place by land or by sailing ships. This used to take several months. The invention of steam ships, which used this power in the engines fitted in their ships, made sea journeys faster. A journey from England to India, took several months by sailing ships. could be made in six weeks by sailing ships. Now, an air journey from India to England takes only 8-10 hours.

4. What does communication means?

Ans Communication means to be in touch with other through speaking, writing, reading or travelling.

5. Arrange these 'power words' in the right time order: electricity, muscle, petrol, steam.

Ans Muscle - Steam - Petrol - electricity.
