Model Test Paper 1

Maximum Marks: 50 **Duration: 2 hours**

Section A is compulsory. Attempt **any four** questions from **Section B**.
The intended marks for questions or parts of questions are given in brackets [ ].

SECTION A (30 Marks)

Attempt all questions from this section.

Question 1

A. Select the correct answers to the questions from the given options.
(Do not copy the questions. Write the correct answer only.) [1 × 10 = 10]

i. Food items rich in carbohydrates are known as ..... foods.
a. energy-giving b. body-building c. protective d. none of these

ii. Salivary glands are present in ..... .
a. oesophagus b. stomach c. mouth d. liver

iii. Urine is formed inside ..... .
a. ureters b. urethra c. urinary bladder d. kidneys

iv. Plants with weak stems and heavy fruits that grows along the ground are called ..... .
a. trees b. herbs c. shrubs d. creepers

v. Sand can be separated from the mixture of sand and water through the process of ..... .
a. filtration b. condensation c. melting d. evaporation

vi. Coconut plant gives us ..... .
a. tea b. coir c. medicine d. gum

vii. An example of a plant that grow in dessert is ..... .
a. pine b. Mango c. gulmohar d. acacia

viii. Flesh-eating animals are called ..... .
a. herbivores b. carnivores c. omnivores d. amphibians

ix. States of matter in which the particles are tightly packed is ..... .
a. solid b. liquid c. gas d. all of these

x. Standard unit of temperature is ..... .
a. cubit b. metre c. litre d. degree Fahrenheit

Question 2

A. Name the following: [1 × 5 = 5]

i. Two good sources of vitamin A

ii. A mineral needed for the formation of blood

iii. The force exerted by the muscles to do work

iv. The liquid that reduces friction between two surfaces

v. The habitat of an octopus

B. Match Column A with Column B. [1 × 5 = 5]

Column A	Column B
i. Stomach	a. Fibre
ii. Fibrous root	b. Moving air
iii. Flax	c. A desert plant
iv. Cactus	d. Churning movement occurs
v. Wind	e. Bushy root

C. Choose the odd one out from the following terms and name the category to which the others belong: [1 × 5 = 5]

i. Metre, Centimetre, Litre, Cubit

ii. Milk, Pen, Petrol, Oil

iii. Spiracles, Lungs, Molar, Gills

iv. Chalk, Sugar, Soil, Wax

v. Sun, Candle, Book, Torch

D. Complete the following by choosing the correct answers from the bracket: [1 × 5 = 5]

i. Plants need sunlight for ..... (photosynthesis/transpiration).

ii. The standard unit for measuring mass is ..... (metre/gram).

iii. ..... (Grease/Water) reduces friction.

iv. The force that pulls every object downwards is ..... (frictional/gravitational) force.

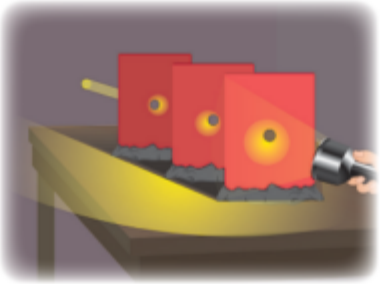
v. Strong and salt-laden winds blow in ..... (desert/coastal areas).

SECTION A (20 Marks)

Attempt all questions from this section.

Question 3 **[5]**

a. Look at the given activity, and answer the questions that follow.



i. What is the aim of the activity? [1]

ii. Explain the activity. [1]

b. Mention the different parts of a tooth. [2]

c. What are digestive juices? [1]

Question 4 **[5]**

a. Look at the given picture, and answer the questions that follow.

   i. Identify the plant and its habitat. [1]

   ii. Mention any two adaptations that it has in order to grow in that particular habitat. [1]

b. Describe the different parts of a leaf. [2]

c. Define air pollution. [1]

Question 5 **[5]**

a. Why is the moon not considered as the natural source of light although it provides light at night? [1]

b. Differentiate between temporary and permanent teeth. [2]

c. Draw any four plants that grow in different habitats with names. [2]

Question 6 **[5]**

a. Study the given diagram, and answer the questions that follow.

   i. Identify the process shown in the diagram. [1]

   ii. Explain the process. [1]

b. Write the name of any two plants and their products that we use. [2]

c. What is a breeze? [1]

Questions 7 **[5]**

a. Mention any two adaptations of herbivore. [1]

b. Name two things that have streamlined shape. Why do they have such shape? [2]

c. Draw a neat diagram of a clinical thermometer. [2]

Question 8 **[5]**

a. Study the given picture, and answer the questions that follow.

   i. What do you see in the given picture? [1]

   ii. What are these bubbles that can be seen in the picture? [1]

b. Describe two functions of root. [2]

c. Why do trees that grow on mountains are usually cone-shaped? [1]

Model Test Paper 2

Maximum Marks: 50 **Duration: 2 hours**

Section A is compulsory. Attempt **any four** questions from **Section B**.
The intended marks for questions or parts of questions are given in brackets [ ].

SECTION A (30 Marks)

Attempt all questions from this section.

Question 1

A. Select the correct answers to the questions from the given options.
(Do not copy the questions. Write the correct answer only): [1 × 10 = 10]

i. Urine is stored inside ..... .
a. kidney b. urethra c. urinary bladder d. ureters

ii. Calcium is needed for the formation of ..... .
a. blood b. bones c. saliva d. roughage

iii. Coir us obtained from ..... plant.
a. pine b. coconut c. neem d. acacia

iv. Which of the following is not a part of a leaf?
a. Midrib b. Lamina c. Petiole d. Tunk

v. Which of the following have breathing roots?
a. Desert plants b. Floating plants
c. Insectivorous plants d. Mangrove plants

vi. The most abundant gas is ..... .
a. oxygen b. nitrogen c. carbon dioxide d. hydrogen

vii. An example of insoluble substance in water is ..... .
a. salt b. oxygen c. mud d. milk

viii. An example of translucent substance is ..... .
a. tracing paper b. wood c. glass d. plastic bottle

ix. Which of the following is not a standard unit of measurement?
a. Centimetre b. Handspan c. Litre d. Kilogram

x. Which of the following substances cannot reduce friction?
a. Lubricants b. Sand c. Soil d. Salt

Question 2

A. Name the following: [1 × 5 = 5]

i. Nutrient that helps to keep our body warm

ii. A very strong and thin thread that is used to clean the area between the teeth

iii. The part between the mouth and stomach, through which the food passes.

iv. An artificial source of light

v. The gas which the living things breathe.

B. Match Column A with Column B. [1 × 5 = 5]

Column A	Column B
i. Iron	a. Opaque object
ii. Temporary teeth	b. Fibre
iii. Book	c. Litre
iv. Cotton	d. Spinach
v. Capacity	e. 20 in number

C. Choose the odd one out from the following terms and name the category to which the others belong: [1 × 5 = 5]

i. Tree, Herb, Shrub, Potato

ii. Milk, Oil, Petrol, Wood

iii. Desert, Mountain, Grass, Plain

iv. Lion, Tiger, Leopard, Cow

v. Lemon juice, Tea, Milkshake, Salt

D. Complete the following by choosing the correct answers from the bracket: [1 × 5 = 5]

i. The length of shadow is the shortest during ..... (morning/noon).

ii. The ..... (mass/temperature) of an object tells us amount of material an object contains.

iii. The force that slows down a moving object is called ..... (muscular/frictional) force.

iv. The plant that grows in desert is ..... (acacia/coconut) plant.

v. We should reduce ..... (pollution/population) of air, water, and soil.

SECTION A (20 Marks)

Attempt all questions from this section.

Question 3 **[5]**

a. Study the given diagram, and answer the questions that follow.

i. Explain the process shown in the diagram. [1]

ii. Give an example where this method of separation is used. [1]

b. Explain why young children should eat more protein-rich food. [2]

c. Define nutrients. [1]

Question 4 **[5]**

a. Look at the given picture, and answer the questions that follow:

i. Identify the plant. [1]

ii. Mention two characteristics of this plant. [1]

b. What is roughage? Why it is important for us? [2]

c. Define gravitational force. [1]

Question 5 **[5]**

a. What are desert plants? Give an example. [1]

b. Define omnivores. Give two examples. [2]

c. Draw a neat, labelled diagram of a magnet with iron nails. [2]

Question 6 **[5]**

a. Study the given diagram, and answer the questions that follow: [2]

i. Identify the process shown in the diagram. [1]

ii. Explain the process. [1]

b. What is a balanced diet? Why it is important? [2]

c. Write any two properties of air in brief. [1]

Question 7 **[5]**

a. What are non-green plants? Give an example. [1]

b. How can you see the seven colours of visible light? Name them. [2]

c. Draw neat diagrams of tap root and fibrous root. [2]

Question 8 **[5]**

a. Look at the given activity, and answer the questions that follow:

i. What is the aim of the activity? [1]

ii. Write the observation and conclusion of the activity. [1]

b. What is the difference between natural and artificial sources of light? Give an example of each. [2]

c. What is the difference between the solute and the solvent? [1]

Key Words

Chapter 1

Nutrients Substances present in different food items that are needed for energy, health, and the proper growth of our body

Carbohydrates The nutrients that provide energy to our body

Proteins The nutrients that help in the growth and repair of our body

Roughage The part of the food that cannot be digested by our body

Balanced diet Diet that contains all the nutrients in the right amounts, roughage, and water

Chapter 2

Crown The part of the tooth that can be seen above the gums

Root The part of the tooth that is present inside the gums

Chapter 3

Organ system A group of organs that work together to perform a particular function of our body

Digestion The process by which food is broken down into a simpler form so that it can be easily taken in or absorbed by our body

Excretory system An organ system that helps in removing wastes from our body

Excretion The process by which wastes get removed from our body

Chapter 4

Root The part of a plant that usually grows below the soil

Shoot The part of a plant that grows above the soil

Chlorophyll A green substance present in leaves, which helps them to absorb sunlight

Leaf blade The flat part of a leaf

Midrib A tube-like structure that runs down through the centre of a leaf

Leaf stalk The part that attaches the leaf to a branch or a stem

Photosynthesis The process by which green plants prepare their own food

Chapter 5

Terrestrial plants Plants that grow on land

Aquatic plants Plants that grow in water

Floating plants Plants that float on water

Fixed plants Plants that have their roots fixed to the bottom of a pond

Underwater plants Plants that grow under the surface of water

Insectivorous plants Plants that feed on insects

Non-green plants Plants that do not have chlorophyll

Chapter 6

Terrestrial animals Animals that live on land

Aestivation The inactivity shown by some animals during the hot summer months to prevent loss of water from their bodies

Hibernation The inactivity shown by some animals during winter months

Amphibians Animals that live both on land and in water

Herbivores Plant-eating animals

Carnivores Flesh-eating animals

Omnivores Animals that eat plants as well as the flesh of other animals

Chapter 7

Matter Any substance that occupies space and has mass

Solids Things that have a definite shape

Liquids Things that do not have a definite shape and take the shape of the container

Gases Things that do not have any shape of their own and fill up all the available space in a container

Wind Moving air

Breeze Gentle wind

Breathing The process by which air is taken in and given out of the body

Inhalation Inhaling air through the nose by human beings

Exhalation Exhaling air through the nose by human beings

Air pollution Smoke coming out from vehicles, factories, burning garbage, bursting crackers

Chapter 8

Solute The substance that gets dissolved

Solvent The substance in which a solute dissolves

Soluble substances Substances that dissolve completely in a liquid to form a solution

Insoluble substances Substances that do not dissolve in a liquid

Filtration In this process, the mixture is passed through a filter paper for separation

Sedimentation The process in which the insoluble impurities settle down

Decantation The process in which water is gently poured out after sedimentation

Chapter 9

Luminous objects Objects that give out their own light

Non-luminous objects Objects that do not have their own light

Chapter 10

Measurement The process of finding out the size or the quantity of something

Unit A fixed quantity that is used as a standard of measurement

Length The size or the measure of how long something is

Mass The amount of material an object contains

Capacity The amount of liquid a container can hold

Chapter 11

Force A push or pull acting on an object

Force of gravity The force that pulls every object downwards towards the centre of the Earth

Force of friction The force that acts between the object and the surface, which either slows down the object or stops it completely

Chapter 12

Contact force A force that acts at the point of contact between the objects, for example, force due to friction

Lubricants Substances that can reduce friction by smoothening out the two surfaces in contact with each other
