

DO YOU KNOW WHY?

A. Discuss why these things happen.

1. Mother birds sit on their eggs.
2. We feel thirsty several times during the day.
3. Small gaps are left between rails while laying a railway track.
4. Lemons and, sometimes, oranges taste sour.
5. A fresh tomato rots after it is kept out of the refrigerator for a few days.
6. We see lightning before we hear thunder.
7. Leaves change their colour in autumn.
8. We breathe heavily after running, climbing stairs, or exercising.
9. We, sometimes, hear creaking sounds from doors and wooden furniture in winter.

*A small gap
between rails*

Trees in autumn

B. This is a picture of a person floating in the Dead Sea. He will not sink. Why?

Did You Know?

- When an adult—weighing about 72 kg—sleeps, they burn about 69 calories in an hour.
- If you boil seawater, the water will evaporate and leave behind salt crystals. This salt can be used in our food.
- Frozen food does not spoil because it is stored at very low temperatures, where germs, mould and other food contaminants cannot grow.

C. In your own *Find Out* book, make a list like this:

Harmful

Cigarettes

Very oily food

Helpful

Clean water

Green vegetables

Both harmful and helpful

Mobile phone

Sugar
