

A. Unscramble the letters to write the correct words.

1. The ____ (PDIA) was launched in 2010 by ____ (LEAPP), a leading computer company. It is a tablet computer that plays videos, audio, and has thousands of applications.
2. MacBook Air, launched in 2008 by Apple, is a very slim ____ (POLPAT), also known as a ____ (OBOKNOTE).
3. ____ (KPSYE) allowed people to communicate by voice, video and instant messaging, and share photos and videos through the Internet. It was shut down in May 2025.
4. As of 2025, China has the highest number of ____ (EETITNRN) users in the world.
5. ____ (INAMSTAGR) and ____ (TUEBOUY) are among the largest social networking sites in the world.

B. In your own *Find Out* book, add one more fact to this list:

- An AIBO is a robotic dog created by Sony. Computer software has given it abilities to recognize its owner, to respond to their call, to sleep, to exercise, to play and to even express fear, joy, surprise and anger.
- A humanoid robot is a robot that resembles the human body. OceanOne is a good example of a modern-day humanoid robot. It completed its first mission in 2016, when it went diving for treasure in a shipwreck, off the coast of France, at a depth of 100 m in the sea. The robot is remote-controlled and 'thinks' and acts like a human deep sea diver.

Did You Know?

- Artificial Intelligence (AI) gives machines the ability to solve a problem and do a job like a human would. Robots and computers have Artificial Intelligence.
- A microblog allows people to exchange small files, short messages, images, etc.

Listen and Talk

'Gadgets and machines are helpful. But they can be misused and become harmful to us.' Discuss.
