

Warm up

Most of Earth's water is in the oceans in the form of salt water, which is unfit for drinking. Only 3% of Earth's water is freshwater—water that contains little to no salt. Most of the freshwater is frozen in ice caps and glaciers, while some is located underground, between the rocks. Only a small percentage of freshwater is found in rivers and lakes, and is fit for use by humans, animals and plants.

Study the figures in the picture carefully. Find out what percentage of freshwater is found in rivers and lakes, and is available for human use.

Water is a resource that we need to use carefully. Here is a play that warns us against the misuse of water. This is an **ensemble theatre**, so a large number of people can take part in the play. There is no lead role and roles can be **interchanged** with every performance.

CHARACTERS:

Woman	Farmer	Young man	TV Journalist
Everybody	Ocean	Rainfall	Lake
Groundwater	Sea	Water Tap	Judge
Water	Somebody	Water in a Bottle	Land

ensemble theatre: a play written to be performed by a group of actors altogether on stage at the same time
interchanged: exchanged

SCENE 1

Woman wakes up to brush her teeth. She turns the tap on. There is no water. Farmer goes to water his crops in the field, but there is no water in the well. Woman goes to the hand pump to fill water and there is no water! Young man goes to a pot of drinking water; the pot is empty.

SCENE 2

TV Journalist Breaking news, live and **exclusive** on Earth TV. All the water has disappeared from our planet. All water bodies have filed a case against **Everybody**! To solve this problem, Everybody must be present at the court hearing today.

SCENE 3: MEETING OF WATER SOURCES

Ocean (*old, serious*) For **centuries** now, we have been misused by Everybody. It is about time we stop all supplies because if Everybody continues to treat us badly, we will all be finished.

The others clap to show they agree.

Rainfall (*angry*) If only they had saved some of me, nobody would have suffered.

Lake (*sad and fragile*) I used to have so many shades of green and blue. These days, Sir, my colours are changing from blue-green to **grey-sludge**. I'm filled with harmful, smelly chemicals. All my fish are dying.

Groundwater (*in a resigned tone*) Everybody wants to chase me out. Everybody wants to drink me up. I try to hide in little corners, but every time I hide, a new **borewell** comes and draws me out. I'm getting tired of this hide-and-seek because I lose all the time. I'm not a magic vessel with an endless supply!

Sea (*calm*) Everybody needs us. We just have to understand each other. I know so many people who have sung songs to me, written poems about me, come to my shores every time the sun sets. Everybody is not bad. Let's tell Everybody how we feel and solve this problem.

Try to identify every water body in the picture below based on their descriptions in the play. Discuss the answers in class.

exclusive: available only to a particular person or group **Everybody:** (here) a character who represents the entire human race **centuries:** hundreds of years **fragile:** weak **grey-sludge:** (here) muddy colour of dirty oil or industrial waste **resigned:** having accepted defeat **borewell:** a long pipe with a pump that is used to extract groundwater

Water Tap Let's face it. If people didn't have water, would we be happy? If nobody used us, of what use would we be? We need Everybody just as much as Everybody needs us.

SCENE 4: AT THE COURTROOM

*Everybody can be played by more than one actor. They should, however, **symbolize** one body, one voice. Water sources can be scattered across the stage. **Chaos** in the room.*

Explain what 'one body, one voice' means.

Judge Both parties will be given a chance to present their case.

Water *(shouting in protest)*
Water, water everywhere,
not a drop to drink
Water, water everywhere,
EVERYBODY needs to think
Water, water nowhere,
you are at the **brink**.

Judge Order! Order! Order! Today in my court, the case of Water Sources **versus** Everybody will be heard. Both parties will be given a chance to present their case. Who will begin?

Water My Lord, we have had to stop supplies to Everybody because there just isn't enough water.

Everybody Objection, My Lord! It is not our fault. *(pointing at **Somebody**)* It is Somebody's fault.

Somebody Objection, My Lord! Everybody always says it's Somebody's fault. I'm sorry but this time it's Everybody's fault. So, Everybody has to answer.

Judge Everybody, do you have anything to say in your **defence**?

Everybody Yes, My Lord. We want to know why and how we are responsible for this problem.

symbolize: represent **chaos:** complete confusion **brink:** (here) edge of trouble **versus:** against
Somebody: a character in this play who represents everything that we blame for our own mistakes **defence:** act of presenting an argument in court to prove one's innocence

Water I would like to call upon Water Tap as my first **witness**.

Water Tap I am so tired of my life. Every day, for every single thing, people say, “Just turn the tap on.” They always leave me on longer than they need to and my water goes down the drain.

Water My Lord, we are being wasted. We get mixed up with waste and feel more wasted. After so many years of waste, how can we keep saving water for Everybody? We had to stop.

Everybody is silent and looking down.

Judge What do you have to say, Everybody?

Everybody Some of us do not realize what we have. We may have been wasting water, but we also know that Water is **indispensable**.

Judge Water, do you have anything more to say?

Rainfall My Lord, Everybody lets me fall on the roads, flow uselessly and make a big mess. Even in cities, I could be used to water plants, to wash vehicles and if **purified**, even to drink. Why can't people save some rain when I fall? I fall for them, not for me!

Everybody We might have become a little **indifferent**, but we love the rain. Please don't stop raining for us! We will save rainwater and reuse it.

Judge We will have to wait and see. Water, any other problems?

Water in a Bottle Everybody, I must bring to your notice that you have no idea how you waste me. So many times, only a few sips are taken and then, I am thrown away. If only Everybody could drink as much as they want and recharge the ground with the extra water.

Everybody Yes, we will have to rethink the way we live our lives.

Judge Good, write that down.

Land I know I'm not water, My Lord, but I am involved in this too. All the water that is being used is being stored by me. If Everybody uses too much water, and wastes it, then I will not have water to give any more. I can recycle water a little bit, but Everybody needs to know that I can't do

What is Water in a Bottle upset about?

witness: a person who gives evidence in court **indispensable:** too important to do without; essential
purified: made clean by removing all dirty and harmful matter **indifferent:** having no interest in something

this fast, and it takes a long time. So, I request Everybody to plant more trees and water them and use water wisely, so I can keep providing people with water.

Everybody We will take note of that, My Lord.

Groundwater I have something to say. You don't forget to recharge your phones, do you? You don't forget to eat and recharge your energy, do you? If I dry up, you will all dry up like me. I need to be recharged, and rainfall is not enough. Whenever it rains, you can try and give some of that rainwater to me and I will use it to recharge myself.

Also, if you're throwing away **spare** or waste water, try throwing it on the ground, on the soil. Land here (*pointing towards Land*) will store it up and give it to me and then you can take it back whenever you need it. This way, I have more water and you have more water!

Everybody We really have been selfish. Please give us another chance; we will look after you like you have looked after us.

Judge Now, it's completely up to you, Water. As far as I can see, most of your points cannot be defended by Everybody. I have to let you have the final say.

Water Thank you, My Lord. It is **evident** that Everybody is guilty. We are **grateful** that you have listened to us. But, we hope that this situation doesn't arise again. We would like to flow clean, free and happy. We want to see a green, clean and pure planet. Everybody, we will be bored without you, and we want to be there for you. Just treat us wisely and kindly.

Everybody You have my word for it, Water. Thank you for trusting us.

This play was scripted by Maraa, a media collective, for the Schools Water Portal—www.schools.indiawaterportal.org. The Schools Water Portal is a platform for sharing knowledge on water as a resource, among teachers, students, school managements and parents. Misuse of water is a key concern today and this portal aims to bring about a change by making the young generation aware of various water-related issues, their causes and the available solutions.

Make connections

Map the story

Answer the following questions based on the play.

- In the play, water has been represented by different characters. List their names in the word web given below. One has been done for you.

- Fill in the blanks.
 - The news that Water has disappeared is shown on _____ TV.
 - Pollution has changed the colour of the lake to _____.
 - Water from the taps just goes down the _____.
 - In the play, the idea of recharging the ground with water is first given by _____.

Deep dive

Answer the following questions with reference to context.

- Breaking news, live and exclusive on Earth TV. All the water has disappeared from our planet.*

RECALL

- Who said these lines?

INFER

- List the four water sources that had 'disappeared' at the beginning of the play. Why had they disappeared?

ANALYSE

- Write a water-themed breaking news headline.

2. *Groundwater: I have something to say. You don't forget to recharge your phones, do you?
You don't forget to eat and recharge your energy, do you?*

RECALL

- To whom was Groundwater speaking these lines?
- What does the word 'recharge' mean?

INFER

- What were the two steps that Groundwater suggested to recharge the underground water?

ANALYSE

- What do you think will happen if we don't let Groundwater recharge and exhaust it completely?

Read, reflect and write

- Why did the water bodies decide to take Everybody to court?
- What did Water wish for at the end of the play?
- Name a few other natural resources that need to be saved. Give suggestions on how all of us can help save them.

Integrate

The amount of fresh water used by a person or a group for all their needs is called their **water footprint**.

Calculate your water footprint by measuring the amount of water your family uses every day. Review the use of water, and make a pie or bar chart based on your findings. Plan how you can use water in a wiser way.

Word wall

Words related to the environment

Here are some words related to the environment. Discuss these words with your teacher. Circle the words that are good for the environment. Cross out (X) the ones that are not.

recharge	oil-slick	deforestation	conservation
sanctuary	recycle	global warming	solar energy
pollute	greening	poaching	erosion

- In this section, we will:
- classify words related to the environment into good or bad.
 - write a paragraph using words related to the environment.
 - learn the terms used for natural disasters. (C-3.2, C-4.2)

Write a paragraph using any six of the words given in the box.

Natural disasters

Do you know what a **natural disaster** is? It is a natural event that causes great damage or loss of life. When we don't care for our environment, natural disasters tend to happen more often. Let us identify and learn more about some natural disasters.

Match the words to their definitions and then, number the pictures accordingly.

- | | | | | |
|----------------------|---|-----------------------|---|-----------------------|
| 1. drought | a. a sudden strong shaking of the ground that may cause loss of life and property | ☐ | i.  | ☐ |
| 2. earthquake | b. very dry weather when there is no rain, which leads to groundwater shortage and failure of crops | ☐ | ii.  | ☐ |
| 3. flood | c. a very large ocean wave that destroys things when it reaches land | ☐ | iii.  | ☐ |
| 4. tidal wave | d. a fierce storm with very strong winds | ☐ | iv.  | ☐ |
| 5. typhoon | e. gases and hot liquid rock (lava) bursting out from a mountain | ☐ | v.  | ☐ |
| 6. volcanic eruption | f. a lot of water covering the land | ☐ | vi.  | ☐ |

Grammar time

Interrogative pronouns

Read the given questions.

- **Who** will begin?
- **What** do you have to say, Everybody?

A **pronoun** is a word used in place of a noun to avoid repetition of the noun.

The words *who* and *what* in the questions given above are **interrogative pronouns**.

ANCHOR CHART

USE OF INTERROGATIVE PRONOUNS

Interrogative pronouns are pronouns that are used to ask **questions**.

They ask information questions that require more than a 'yes' or 'no' answer.

Interrogative pronouns	Short description	Examples
What	to ask about things	What is that? What do you want to eat?
Which	to talk about something that has been mentioned before , or is understood from the context, and when there is a choice between more than one option	There are two books here. Which is yours? Which of the boys is your brother?
Who	to ask about people	Who will take you to school? Who is your best friend?
Whose	to ask about the owners of things	Whose is this book? Whose are those roller skates?
Whom	to ask about people —less usual and more formal than <i>who</i>	Whom did you invite? Whom should I ask for help?

1. Match the questions to their answers.

Questions	Answers
a. What do you like to play?	i. I play with Kabir. ☐
b. With whom do you play?	ii. Neither, I like football. ☐
c. Which one do you like, chess or ludo?	iii. It is Athira's football. ☐
d. There is a football in the cupboard. Whose is it?	iv. I like to play tennis. ☐

2. Fill in the blanks using suitable interrogative pronouns.

- _____ are you doing?
- There is a coat lying on the chair. _____ is it?
- _____ will play tennis with me?
- For _____ are these cookies?
- Here are two interesting books. _____ one would you like to read?

Spelling

-al, -el and -le words

Read the words given below and say them aloud.

final

vessel

people

The last two letters of the words are *-al*, *-el* and *-le*. However, they all end with the same /l/ sound.

The words given in the table below also end with the letters *-al*, *-el* or *-le*. Only one word in each row is spelled correctly. Identify the correct spelling and cross out the other two misspelt words in the row. Then, check your answers with the help of a dictionary. One has been done for you.

- | | | |
|-----------------------|---------------------|----------|
| 1. artical | artichel | article |
| 2. normal | normel | normle |
| 3. channal | channel | channle |
| 4. terribal | terribel | terrible |
| 5. possibal | possibel | possible |
| 6. mammal | mammel | mammle |
| 7. quarral | quarrel | quarrle |
| 8. comical | comicel | comicle |

In this section, we will:

- learn to spell words ending with /l/ sound. (C-3.4)

Write well

Poster composition

Posters are displayed in public locations to convey information to a large group of people. They are often used to address a social message, raise awareness or issue a warning.

HOW TO MAKE AN IMPACTFUL POSTER

A **good poster** should include:

- * a catchy title in bold that attracts the reader.
- * short, concise sentences.
- * an eye-catching layout.
- * an attractive colour scheme.
- * catchy phrases or slogans.
- * simple visuals or photographs.
- * a clear call to action.

Example:

DO's

- ✓ Put your poster in a box.
- ✓ Make your message short and clear.
- ✓ Use a strong voice.
- ✓ Make the text readable from a distance.

DONT's

- ✗ Don't use complex language.
- ✗ Don't use too much text or highlight.
- ✗ Don't use lengthy sentences.
- ✗ Don't use too many images or font styles.

REMEMBER: A good poster always inspires action!

Look at the poster below that shows some ways of saving water. Add three more ways of your own. Draw pictures, write captions and explain them in your own words in your notebook. Then, expand your ideas in a composition of 120–150 words.

SAVE WATER

Turn it off

Fix the drip

Use a bucket

- In this section, we will:
- listen to a story to identify the correct sequence of events.
 - narrate the story in our own words. (C-1.1, C-1.3)

Listen and speak well

The pictures given below have been jumbled up. Listen to the story and number the pictures correctly. Narrate the story in your own words after numbering them.
